

# Touchscreens for Everything

## Unified Architecture from 10" to 65"

Elo's broad selection of interactive technologies ranging from 10" to 65" designed for versatile applications. Elo's unified platform is perfect for everything from point-of-sale and self-service to automation controls and collaboration.

## Products for Every Level of Integration

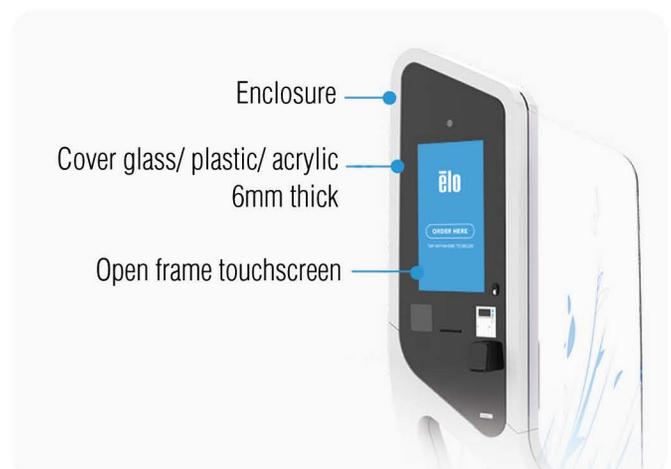

Elo touchscreens and displays are ruggedized to operate in extreme temperatures and have the ability to withstand dirt, debris or harsh cleaners that may come in contact with the device. Elo controllers are specifically designed to work with Elo touchscreens so users never have to worry about integration issues or compatibility.

## Touch Thru Enabled Experiences

Powered by Elo's TouchPro® PCAP

Reimagine your design capabilities with Elo's Touch Thru functionality. Installation with an additional layer of glass, plastic or acrylic can now leverage Elo TouchPro PCAP touchscreens which support Touch Thru functionality.

# Touchscreens for Everything
