

UTC-320SL

21.5" Ubiquitous Touch Computer UTC-320SL with Active Fan Solution (Fan SKU) UTC-320SL with Passive Fan Solution (Fanless SKU)

Features

- Fan SKU and Fanless SKU system design
- Socket Type CPU with Intel® Core™ 12th/13th/14th Gen processor
- Multiple power input options (Power Din 4 pins/Terminal Block)
- 21.5" monitor with 16:9 widescreen display
- IP65-rated front panel for water and dust resistance
- VESA 100 mm standard mounting holes for varied mounting demands
- Detachable frame design for panel mount applications
- Support DeviceOn/iService software for remote device management
- Support TPM 2.0

Introduction

UTC-320SL series all-in-one computer features a signature black plastic exterior and a compact system design, including socket type CPUs, multiple cooling solutions (Fan SKU & Fanless SKU), and power connector options. Powered by an Intel® Core™ 12th/13th/14th Gen processor that supports Windows, and Linux OS. With the removable frame, the system also could fulfill industries or control system applications with panel mounting design. UTC series touch panel computers are the best investments to enhance user satisfaction, further brand equity, and maximize business profits.

DeviceOn/iService

Unified Remote Device Management Software

Features

- Supports Advantech devices equipped with Windows, Android, and Linux OS
- Flexible device, location, user, and permissions management
- Enables remote monitoring and control of hardware, software, and peripherals
- Supports over-the-air (OTA) firmware and software updates
- Ensures quick, easy, and secure device onboarding
- RESTful APIs for third-party system integration

Introduction

Advantech's DeviceOn/iService is a next-generation unified device management solution based on the WISE-DeviceOn platform. Designed to enable centralized monitoring and remote management, DeviceOn/iService supports Advantech devices equipped with Windows, Linux, or Android operating systems. The software also supports the management of applications and integrated peripherals, such as a barcode scanner, card reader, camera, and printer. Users can remotely access and control connected devices, take screenshots, rollout OTA upgrades, and use remote desktop capabilities for troubleshooting from any location at any time. Moreover, DeviceOn/iService supports batch operations to facilitate the management of multiple devices simultaneously for easy and convenient device configuration and deployment.

Total Management

Devices & Hardware

- Windows, Linux, Android
- Hardware, storage, battery

Software & Peripherals

- Software monitoring & access
- Screens, USB devices, printers

Open for Expansion

- Peripheral integration
- Open APIs for integration

Remote Access

Real-Time Monitoring

- Connection/hardware status
- Software/peripheral status
- Failure notifications

Remote Controls

- Power controls
- Audio, backlight controls
- Software controls

Troubleshooting

- Screenshots
- Remote desktop support

Operational Efficiency

OTA updates

- System/software updates
- File repository management
- App store

Batch Controls

- 1-to-many batch reboot, etc.
- Time-saving tasks

Setup Booster

- Software/peripheral watchlist
- Roles, rule templates

Note: Some functions may vary according to the product
